SUMMARY

Full-stack web developer with a background in sales and logistics. A clever problem-solver with a dedication for learning new processes and refining them. Strengths in attention to detail, adaptability, interpersonal skills and application of highly methodical skills to resolve intricate challenges.

PROJECTS

SiteSeer | github.com/jorge30fm/SiteSeers   Sep 2022
Lodging application featuring secure login and search based on desired location users would like to camp.
Stack: React, Javascript, Node.js, Express.js, Mongoose.js, Web-Vitals, Cloudinary.
- Employed best practices in front-end development to ensure the search bar was scalable and maintainable.
- Added seed data to enhance functionality and provide a more realistic user experience.
- Exploited React state to implement advanced carousel features; notably, dynamic loading of campsite information.

BugBash! | github.com/amklenk/New-Dev-Forum   Jul 2022
Social media community for new developers to share and fix coding bugs they may have.
Stack: Javascript, Node.js, Express.js, DarkMode.js,Handlebars.js, MySQL, Heroku, Cloudinary, Figma, Bootstrap.
- Optimized page performance using Handlebars.js to refactor code to reduce unnecessary DOM manipulation.
- Successfully resolved merge conflicts in Git to ensure smooth collaboration and integration of code changes.
- Strengthened login security feature to has user information to prevent leak of sensitive data.

Work Day Scheduler | github.com/Nowaczewski/My_Work_Day_scheduler   May 2022
A work day planner made to help users store data for later reference.
Stack: JavaScript , CSS, HTML, Moment.js.
- Oversaw the implementation of the JQuery calendar and booking appointment features of the application.
- Constructed link between client side javascript with the backend appointments API.
- Implemented a loop function to facilitate the addition of saved data.

EXPERIENCE

Polymershapes   Dec 2018 – Present
Charleston, SC & Knoxville, TN
Inside Sales Representative & Purchasing
- participated in beta testing of the company's new software, providing valuable feedback on usability functionality, and overall experience.
- Established and maintained strong relationships with vendors and suppliers, negotiating favorable terms and conditions for inventory purchases and ensuring high-quality products were consistently delivered.
- Participated as a beta tester for Polymershapes software prior to launch, providing feedback on functionality.

Autobell Car Wash   Mar 2013 – Dec 2018
Charlotte, NC
Assistant Manager
- Successfully coached and supervised a team of 40 employees, providing them guidance and support.
- Repaired and maintained car wash equipment such as hydraulic pumps, motors, and electrical systems.
- Hand-dried vehicles and meticulously detailed interiors to ensure a pristine finish.
- Liaised with Insurance companies on behalf of the car wash to insure swift resolution of damage claims.
